Nigeria**

Bachelor of Science, Applied Science(2014)

WORK EXPERIENCE

.NET Developer/ DevOps Engineer

Software Business Solutions Consulting (SBSC) (July 2019 - Present)

Responsibilities:

- Involved in all phases of SDLC from software requirements gathering, design, implementation, testing, and support and Product maintenance.
- Created the automated build and deployment process for application, re-engineering setup for better user experience, and leading up to building a continuous integration system for all our products.
- Performed code merge between different release branches by actively working with Development team.
- Develop REST based Web API to interact with entity framework.
- Design review sessions, Technical Design, Coding, Unit Testing, Deployment and support.
- Deployed and configured GIT repositories with branching, forks, tagging, merge requests, and notifications.
- Analyse and resolve conflicts related to merging of source code for GIT.
- Resolved system issues and inconsistencies in coordination with quality assurance and engineering teams.
- Perform Deployment of Release to various QA & UAT in Windows environments.

.NET Developer

Acclio Creative Solutions (Jan. 2017 - July 2019)

Responsibilities:

- Gathered Client requirements and converting them into the Technical Specifications and developed Web Applications using C#.NET.
- Creating the Technical Design Documents.
- Implemented MVC framework to reduce the complexity and to get full control over the behavior of the application.
- Used Microsoft Entity Framework Code First approach for the Data Access Layer for the ASP.NET MVC 3 application.
- Developed stored procedures, views and triggers for data manipulation, ensuring set up relations includes indexing, constraints and foreign keys.
- Used C#.NET as language to develop code behind business logic.
- Used LINQ to Entities, LINQ to SQL, LINQ to XML and LINQ to Objects for retrieving the data proficiently.
- Involved in Database Design, System Analysis, design and development.
- Responsible for the Deployment and Delivery of the product in the client environment.
